GEOGRAPHIC COORDINATES 51 53 N 5 28 E | MAP REFERENCE O File

TITLE View of the lift-gate of the Prins Bernhard lock on the AMSTERDAM-RHINE CANAL at Tiel. The Gate weighs approximately 190 tons, is 18.85 meters wide, 2.35 meters thick and 13.70 meters high. On the high-water side the steel plate tapers from 11 mm at the bottom to 6 mm at the top. On the lock-side the steel plate is uniformly 6 mm thick. The advantage of the lift gate lies in the fact that vessels can moor within five meters of the gate instead of fifteen as with conventional gates. The saving in length of lock chamber is considerable.
